Giba Gorge is a natural valley carved out rock by millions of years of water flow. The deep corridor is walled by steep rocky cliffs which give way to natural grassland slopes, through the middle of which runs the Giba River. Giba Gorge is home to a unique complement of rare and threatened ecosystems with an impressive list of animals and plants.

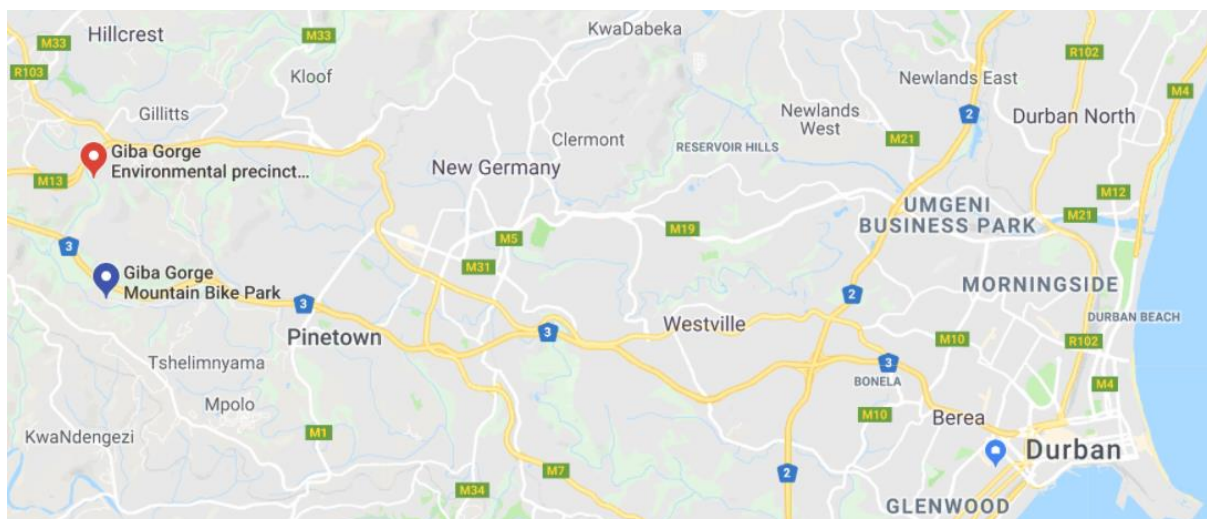

The human history of Giba Gorge has stretched back to the time of the Stone Age. The natural geological structures of Giba provided an important refuge for these early settlers. Anecdotes of more recent settlers tell a romantic tale of this rugged region before civilization really moved in and transformed the area in the last 50 years.

The Giba Gorge Environmental Precinct (GGEP) is a cooperative project between private landowners and the municipality to manage a common area for conservation purposes. There are more than 165 private landowners that surround this common area all of which contribute to the maintenance of this natural heritage.

The reserve is open to the public free of charge. Activities include, walking trails, mountain biking, bird watching plus many other activities.

The directions from Durban are as follows: (a) Travelling in a Westerly direction on the M13 from Durban to Pietermaritzburg, take turn off no 28 marked Hillcrest, Old Main Road, Winston Park. (b) At the traffic lights turn right towards Hillcrest and then first left into St Helier Road. (c) Travel down St Helier Road and just after the small dam on your right, turn left under the M13 and through the tunnel. The entrance to Giba Gorge is less than 1 kilometre, just after the hairpin bend. The boom on the dirt road is on the left hand side. Park at the hairpin bend. (29°48'9.88"S / 30°46'28.20"E)
